

12 Years Experience

Stainless Steel ▪ Nickel Alloy ▪ Alloy Steel ▪ Carbon Steel
Steel Tube Solution | Steel Tube Specialist

About Ark Steel Tube

Ark Steel Tube is a world-class manufacturer and supplier of steel tube products, KWK STEEL is the subsidiary of Ark with over 12 years experience.

Ark Steel Tube plays a crucial role for our customers in oil and gas, aerospace, nuclear, power generation, and medical equipment industries. The company has a friendly, supportive atmosphere with a reputation for innovation.

What's unique about us as a manufacturer is that we have the capability to manufacture both seamless and welded tubes, in a wide range of stainless steel, alloy, carbon, and nickel alloys. This gives our customers great product flexibility with the choice between straight lengths or coils. With an experienced sales staff, onsite quality team, and dedicated account managers, we are able to provide reliable products backed by outstanding service from order to delivery. Whatever application you have in mind, we'll do our utmost to meet and surpass your expectations.

That's why customers around the world turn to us for high quality tubes.

Feature Product

Boiler/Heat Exchanger Tube

Nickel Alloy Tube

Small Diameter Stainless Steel Tube

A/SA268 400 Series Steel Tube

Alloy Steel Tube

U Shaped Tube/ S Shaped Tube/ Finned Tube

Alloy Steel Tube

Alloy Steel Seamless Pipes are made of alloy steel have exceptional performance properties. These are generally developed for energy-related applications involving oil and gas drilling and are subjected to stresses in machine parts.

Standard: ASTM A213,A334, A335,etc.

Steel Grade: T1, T1a, T2, T5, T9, T11, T12, T17, T21, T22, T23, T24, T36, T122, P12, P5, P91, 15Mo3, 12CrMo, 15CrMoG,etc.

Manufacture Process: Seamless

Size: OD: 6-89mm WT: 0.5-9mm Length: Up to 25m

Applications: Boiler, Pipeline Transport, Machinery Industry, Special Purpose, etc.
